Luxurious Living

Take a look inside designer Marina Hanisch's Scarsdale living room..

"This is our living room, a space where we enjoy relaxation and entertaining guests," says Marina Hanisch of Marina Hanisch Interiors. "My husband and I use it the most, while our children tend to gravitate towards other areas of the house. The room is perfect for enjoying a morning coffee, with its vast sliding doors that allow sunlight to flood in and offer great views of our backyard."

She describes the aesthetic as a "blend of modern and eclectic design, marrying a neutral palette with organic textures and unexpected materials."

"I love to incorporate elements like natural stone, lin-

ens, woven furnishings, and wood to achieve a seamless continuity between the interior and exterior of the home," says Hanisch. "The result is a space that feels both airy and spacious, yet cozy and inviting."

Her favorite part of this space is the built-in bookshelves flanking the fireplace. "They serve as a perfect canvas for displaying small art pieces and optimizing storage beyond just books," she says. "Over the years, I've acquired many great ceramic pieces and decorative items, making it the perfect spot to showcase my collection while adding depth and visual interest to the room." **WH**
